The amoun of people have gone away and are going away bestowed upon foreigners, chiefly Catholica because they fear for their personal safety. We believe no ench statement. Any well-behaved money paid for the support of the hospitals and man who fears for his safety in Louisville at the poor-house goes to foreigners, chiefly this time must be a coward. The destruction of peach and other trees during the past winter by field mice, however, has heen very great. In December and Januar, last, the snow came suddenly and fell lightly to a great depth, and for three months there was no thaw to rettle it, so that the mice, hindere hy no obstructions, made their roads in all directions. By the ravages of these vermin, one man on Grand Island has lost his whole orchard of 400 trees, and another of 300. Mr. B. Hodge, of this eity, who has a large fruit farm at Peach Haven, is perbays the greatest sufferer from this source, as his leves is at least \$4000.

It is noticeable, that on these grounds the mice seem in have shown a decided preference for the bark of the peach and apple, as his extensive pear orebards adjoining are almost uniquied. The destructive energies of the field mouse seem not to have been confined to any one county, for we read that in Morroe county alone the loss to fruit growers from this source will reach \$100,000, while good authorities state that there can be little doubt that this loss in the whole State will amount to more than \$1,000,000.—Buffalo Commercial
